

LOT® COMPUTER

COSMO® Cube v1.0 – Operator's Manual

LOT Systems Corporation · brand.lot-systems.com · Made in the USA

WHAT THIS IS

LOT® Computer is a flat, two-piece stainless steel device, 40 x 40 x 5mm, that receives short notifications from your LOT profile on lot-systems.com and shows them on its screen – a pager, not a phone. One camera. One screen. One button, labeled COPY.

IN THE BOX

1 × LOT® Computer · 1 × wireless charging pad (flat silver square, 4 x 4cm, USB-C powered) · this manual.

SETUP

1. CHARGE

Place the device, rear face down, on the charging pad. The screen shows PAIR ME once powered.

2. PAIR

Open lot-systems.com on your phone or laptop, sign in, go to Settings -> Hardware -> Pair Device. Follow the on-screen steps to connect the device to your Wi-Fi and your LOT profile.

3. PLACE

Set the device anywhere on a desk, polished face up. It needs no cable once paired – only occasional time back on the charging pad.

USING IT

The screen stays off between notifications. When your LOT profile has something for you – a reminder, a nudge, a badge unlock – the device wakes its screen and shows a short line of text, for example: “Coffee time!” It stays lit for a few seconds, then sleeps again on its own.

THE COPY BUTTON

One button, rear face, labeled COPY. Press it any time to acknowledge the notification currently on screen – the way a two-way radio operator says “copy” to mean received, understood. Every COPY press appears in your Log tab on lot-systems.com within moments, along with a snapshot of that session's weather reading and, if the camera captured a frame, a note that it did.

CHARGING

Wireless only – there is no port on the device itself. Set it on the pad when the screen shows a low-battery notice. A full charge from the 150mAh cell supports several days of normal pager-style use.

TROUBLESHOOTING

SYMPTOM	WHAT TO DO
Screen never lights up	Confirm pairing in Settings -> Hardware. Re-seat on charging pad.
“PAIR ME” keeps returning	Wi-Fi credentials may have changed. Re-run pairing (Setup, Step 2).
COPY press not in Log tab	Check the device has a network connection; it will retry automatically.
Device feels warm on the pad	Normal during wireless charging. Remove if uncomfortably hot and contact support.

This device carries no data beyond one compressed session summary per use. Full technical specification:
