journey_mode	→.*	Journey Mode	"journey" / "long journey"	Uncommon

Design Notes – v7 Book Lexicon:

The Book Lexicon treats the user's life as a narrative. Each trigger is a literary element appearing naturally in self-reflection. When someone writes "I'm in a new chapter" or "I am the author of my own story," the system recognizes the narrative frame and awards the corresponding badge. These are particularly likely to fire in Memory answers about goals, identity, and growth.

PART XI — DESIGN DOCTRINE

The Five Laws of LOT Badges

1. Badges are discovered, not earned by menu. The system watches. The player expresses. The badge fires.

2. **Hidden badges reward authentic expression.** No one should write "journey" to get `journey_mode`. They write it because that's how they think of their life. The badge confirms what was already true.

3. **Rarity is earned, not purchased.** A mythic badge means you have done something exceptional over months or years. There is no shortcut.

4. **Every badge has a story.** towel_day is not just "check in on May 25." It is a tribute to Douglas Adams, to absurdist wisdom, to the idea that preparation is love. The badge is a small monument.

5. **The system remembers everything.** Badges are permanent. They accumulate. At 284 types in v16, the badge system is itself a biography – a record of what the user expressed, when they showed up, and how long they stayed.

Word Turn Philosophy

word turns operate on the principle that **language is self-disclosure**. When someone writes about their "journey" or "chapter," they are using narrative frames unconsciously. The badge system makes that unconscious frame visible and acknowledged.

The Book Lexicon (v7) extends this to literary structure: hero, villain, quest, ending, author. These are archetypes. When users write them, they are casting their lives as narrative. The system honors that cast.

Time Easter Egg Philosophy

Time easter eggs operate on **attentiveness**. Only someone who checks in at 00:42 with intentionality – or who happens to be awake at that precise threshold – receives the `_answer`. The time gates reward presence in the moment.

The Deep Night Codes (v7) are particularly significant:

- the_answer at 00:42 – for the late-night thinkers who seek meaning

```
- devils_hour at 03:33 – for those between sleep and waking
```

```
- infinity_gate at 08:08 – for the morning practitioners who see loops
```

PART XII – CLOSING TRANSMISSION

LOT SYSTEMS — BADGE CODEX v16

284 badges. 38+ categories. Spanning 7 word-turn lexicons,
7 time easter egg tiers, 6 calendar tiers, 6 behavioral
tiers, 6 mastery tiers, and 6 secret boss layers.

The system does not tell you what to feel.
It waits until you say it yourself.
Then it marks the moment.

v16 adds The Book Lexicon — because every life is
a story, and every person writing their truth
is the author.

"Chapter signal. The archive is listening."
