03 BEHAVIORAL PATTERN BADGES

Earned through behavioral patterns detected by the Quantum Intention Engine. Theme-matched to user's milestone theme.

ID	WATER	ARCH	MAYAN	NAME	DESCRIPTION
balanced	◊◊	■ ■ ■	■ — ■	Balanced	All planner dimensions used
flow	~ · ~	■ ~ ■	≈ ■ ≈	Flow	Engaged 5+ widgets in one session

anchor	= · =	■ ■ ■	— ■ —	Anchor	Stable consistent engagement over time
spiral	~ · ~	■ ■	≈ ~ ≈	Spiral	Revisited same theme across multiple sessions

HOW PATTERNS ARE DETECTED

Pattern badges are detected by the Quantum Intention Engine (QIE) through:

- Signal analysis from all widget interactions
- Log context aggregation (last 30 days of activity)
- Time-window clustering (time-of-day consistency)
- Planner dimension distribution analysis
- Memory answer length and frequency profiling
- Cross-widget session co-occurrence mapping

Pattern badges do NOT expire. Once earned, always held.

Badge symbols rotate based on user's selected theme (water / architecture / mayan).

04 RPG / ARCADE EASTER EGG BADGES

- EASTER EGG RULES:
- Easter egg badges appear in your badge collection but are NOT shown in public profiles by default.
 - The [KONAMI] badge trigger is never fully documented. Finding it is part of the game.
 - GLITCH, VOID, and GHOST badges are only visible in dark mode.
 - Earning TRIPLE SEVEN on a Friday the 13th adds a secret frame to the badge.
 - OVERCLOCK + COMBO earned in the same session = undocumented bonus state.

12 IMPLEMENTATION NOTES

SOURCE FILE

```
src/client/utils/badges.ts
· BadgeType union type (extend for new badges)
· BADGES record: waterSymbol, architectureSymbol per badge
· getBadgeTheme() / setBadgeTheme() – localStorage persistence
· awardBadge() – race-condition-safe via lock flag
· getNextBadgeUnlock() – dequeues toast notifications
· checkAndAwardBadges() – called on milestone events
```

ADDING A NEW BADGE

1. Add ID to BadgeType union
2. Add entry to BADGES record with all theme symbols
3. Add check in checkAndAwardBadges() or relevant event handler
4. Add unlock message for each theme
5. Update badge count in Growth Milestones widget

EASTER EGG IMPLEMENTATION

Easter eggs require event hooks at the widget level:

- Time-based: check timestamp in widget useEffect
- Session-based: track in sessionStorage, award on threshold
- Combo: listen for multiple badge award events in sequence
- Word turns: inject via Memory widget's badge unlock toast

Recommended: create src/client/utils/easterEggs.ts

WORD TURNS (NARRATIVE EASTER EGGS)

Word turns display in the Memory widget's badge unlock toast.

Format: '[KEYWORD] flavor text shown here'

Duration: 6 seconds (same as Evolution Milestone Toast)

Trigger: alongside badge award in queueBadgeUnlock()

Store word turns in: WORD_TURNS record keyed by BadgeType

THEME SELECTION UX

Users choose theme (water / architecture / oceanic-mayan) in Settings.

Default: water theme

Theme applies to: Level field, badge collection, trait separators

RPG theme: unlocked only after earning 5+ easter egg badges
