THE DUNGEON CRAWLER – THEME OVERVIEW

The dungeon is not a metaphor. Or rather: it is the metaphor that always was already literal.

Every roguelike, every tabletop campaign, every RPG session since Gary Gygax published those three booklets in 1974 has been doing what serious self-care practitioners do: going into an uncertain, partially-mapped space, managing limited resources, making decisions under pressure, learning the enemy patterns, and coming back out changed.

D&D; gave us a vocabulary for the interior journey that fairy tales had always implied but never quite named. Boss fight. Level up. Long rest. Skill check. Saving throw. Loot drop. Side quest. Final boss. These are not game terms borrowed for cute metaphor – they are precision instruments for describing what happens in a practice.

When you write in your journal that today felt like a boss fight: you are not being whimsical. You are being exact. The fight was real. The boss was real. The mana was low and you cast your last slot and it landed.

The Dungeon Crawler is the twenty-sixth vocabulary. It says: the interior world is a dungeon. It has floors. It has bosses. It has rest points and side paths and treasure rooms and dragons. It is also the safest place in the world, because you have been here before, and this time you brought a journal.

Roll for initiative.

FLAVOR TEXT – THE DUNGEON CRAWLER

"Roll for initiative." – D&D; Player's Handbook. The dungeon does not wait for you to feel ready. Neither does the practice. You roll when the door opens. You do not roll when you feel ready – you feel ready when you roll. ■■■

CALENDAR EASTER EGG DEEP NOTES

The dungeon has been here since before you were. ■.■

December 18 – Final Fantasy Day

Final Fantasy was released in Japan on December 18, 1987 by Squaresoft. The game that was designed to be the studio's "final" effort before bankruptcy became instead one of the longest-running RPG series in history. Self-care note: the thing you think is your final attempt may be your origin story.

final_fantasy_day ■.■ RARE

■ Dec 18, 1987. The party of four walked into a crystal dungeon and did not look back. The final fantasy was only the first. Neither did you. ■.■

BEHAVIORAL v23 – DUNGEON PATTERN NOTES

dungeon_session

Three or more Dungeon Crawler (v26) trigger words in a single journal entry indicate the operator is actively using RPG dungeon vocabulary as a thinking frame for their self-care narrative. This is not cosplay – it is precision. The boss is named. The loot is claimed. The rest point is marked. The dungeon session badge recognizes that the map is being drawn.

rested_state

A check-in before 09:00 following a day with a check-in after 22:00 describes the full dungeon arc: the long session (deep work, late night, extended challenge) followed by the structured rest (early morning, new day, fresh floor). In D&D terms: completing a dungeon run and then taking a long rest before the next floor. The rested_state badge recognizes the full roguelike cycle – late session + morning reset.

boss_clear

`boss\_fight` + `critical\_roll` appearing together in the earned badge set means the operator has named a high-stakes encounter AND experienced a decisive, high-quality moment in response. The boss was met. The roll was true. The room is clear. This badge is awarded via the checkBadges pass when both source badges are present.

SECRET BOSS v23 – THE FINAL VAULT

One Does Not Simply

Boromir's phrase from the Council of Elrond is culturally encoded as shorthand for "this thing requires more than simple effort." In a self-care journal, writing "one does not simply" is an acknowledgment of genuine difficulty – the recognition that the floor ahead is not standard. The badge rewards naming real complexity without collapse.

one_does_not_simply ◆.■.◆ RARE [HIDDEN]
■ Boromir knew. The dungeon has levels that require more than
a simple walk. You named the difficulty. You did not turn back.
◆.■.◆

Nat Twenty

Writing "nat 20" or "natural twenty" in a journal entry is an extremely specific cultural reference – it belongs only to people who have played tabletop RPGs and use that vocabulary in daily life. When it appears in a self-care journal, it marks a moment of peak performance or unexpected success described through the precise language of the table. The badge is a recognition of that fluency.

nat_twenty ■.●.■ RARE [HIDDEN]
■ The die shows twenty. The dungeon master goes quiet.
You get to say what happens next. ■.●.■

Here Be Dragons

"Here be dragons" appears on the Lenox Globe (c. 1510) and the Hunt-Lenox Globe – the only actual medieval maps with this phrase. It marks the unmapped edge. In a self-care journal, writing this phrase or "wyrn" or "ancient evil" means the operator is standing at the edge of their own map – the territory they have not yet entered. The MYTHIC rarity acknowledges how rare it is to name the unmapped edge directly.

here_be_dragons ■.■.∞ MYTHIC [HIDDEN]
■ The cartographers marked this corner of the map.
You walked into it anyway.
Whatever lives here, you came prepared to look. ■.■.∞

Add these calls to the appropriate runners:

- Journal saves: `checkDungeonCrawlerWords`, `checkDungeonSession`, `checkSecretBossV23`
- Check-in events: `checkCalendarV24`, `checkRestedState`, `recordLateCheckIn`
- Badge check pass: `boss\_clear` is awarded via `checkBadges` when
boss_fight + critical_roll are both present

API stats fields consumed by Mastery Tier v26

- `stats.distinctCheckInDays` – integer >= 1100 triggers `dungeon\_lord`
- `stats.totalJournalWords` – integer >= 350,000 triggers `tome\_of\_lore`
- `stats.signupDate` – ISO date string (>= 6 years triggers `legendary\_run`)
