HIDDEN EASTER EGG BADGES – discovered through play

CHAPTER 1

WELCOME TO THE SIMULATION

LOT Computer is a self-care operating system disguised as an RPG. Every check-in is a signal. Every memory question answered deepens the architecture. Every streak earns a badge. You are not a user. You are the protagonist. The system – the Quantum Intention Engine, the Memory Engine, the Evolution System – literally builds itself from your behavior. What you give it shapes what it becomes.

THE RPG LOOP

- 1. CHECK IN
→ Record your emotional state (signal)
- 2. ANSWER
→ Engage with memory questions (depth)
- 3. PLAN
→ Set your intent for the day (direction)
- 4. OBSERVE
→ Watch the system self-assemble around you
- 5. EARN
→ Unlock badges, achievements, easter eggs
- 6. EVOLVE
→ The interface adapts to your growth

THE TWO PATHS

Choose your metaphor for growth. Both paths lead to the same place – they just tell different stories about how you got there.

WATER PATH (◦ → ≈ → ≅)

Like water: you flow, adapt, deepen, the river itself. Growth is organic,

- | | | |
|-------------|------------|--------------|
| Droplet (◦) | → 7 days | First drops |
| Wave (≈) | → 30 days | Waves begin |
| Current (≅) | → 100 days | Deep current |

CHAPTER 2

MILESTONE BADGE CODEX

Milestone badges are earned through sustained daily practice. They gate automatically from the streak counter – no manual action required. When earned, the badge appears in your Memory widget as a word turn, then updates your public profile Level field.

CHAPTER 3

ACHIEVEMENT REGISTRY

Achievements are deep-progress unlocks derived from your activity logs. Unlike milestone badges (which track streaks), achievements track behavioral patterns – the type, depth, and quality of your practice over time.

CATEGORY: DEPTH

CHAPTER 4

EASTER EGG BADGE CODEX

These badges are not listed in the main UI. They appear as [??] in your badge registry until discovered. Earning them requires specific behaviors, timing, or sequences that the system silently watches for. Some players will never find all of them.

WARNING: The following section contains spoilers. True explorers stop reading here.

CHAPTER 5

LEVEL PROGRESSION & STORY CHAPTERS

Your level is calculated from total activity count across all LOT modules – check-ins, memory answers, planner entries, community messages, and more. Each activity contributes 1 XP. The level curve rewards early engagement while honoring long-term depth.

CHAPTER 6

INTERFACE EVOLUTION & FEATURE UNLOCKS

As you progress, the LOT interface subtly evolves. Visual parameters, typography, and advanced features unlock based on your achievement categories, badge tier, and level. The interface is not static – it is learning from you.

Opacity	0.85 → 1.0	Interface clarity increases with maturity
Letter spacing	-0.02 → 0.01em	Typography refines over time
Glow effects	0 → 0.3	Subtle text glow appears at high achievement
Grid size	4 → 6px	Grid evolves with theme complexity
Transition	400ms → 150ms	UI becomes more responsive with practice
Border radius	0 → 8px	Water theme softens. Architecture sharpens.

FEATURE	UNLOCK TRIGGER	DESCRIPTION
Custom Themes	Level 5	Choose your visual color palette
Badge Selection	Any badge earned	Toggle between Water / Architecture
Widget Arrange	Level 10	Rearrange dashboard widgets to your preference
Intention History	Level 15	Access historical intention tracking
Advanced Memory	Deep Diver achievement	Deeper reflection question sets unlock
Pattern Insights	Moon Cycle achievement	Quantum intent pattern analytics
Mood Patterns	Care 50% OR Level 20	Full mood pattern analysis view
Planner Templates	Week Warrior achievement	Pre-built planner templates
Community Rich	Bridge Builder achievement	Rich community features and profiles
Narrative Reflection	Depth 66% + Level 30	AI narrative synthesis of your journey
Private Spaces	Intimacy 50% OR Courage 100%	Private reflection rooms
Export Data	Level 25	Export your complete practice data
Achievement Gallery	All Exploration badges	Full achievement showcase display
Social Mentions	Full connection path	@ mentions in community chat

CHAPTER 7

WORD TURNS – THE LANGUAGE OF UNLOCK

A "word turn" is the flavor text that appears when a badge or achievement is earned. It surfaces in the Memory Widget for 6–8 seconds before fading. The language is intentional: poetic, minimal, second-person. It speaks to you directly without explaining itself.

CHAPTER 8

SELF-ASSEMBLY – THE LIVING SYSTEM

LOT Computer is not just software. It is a self-assembling architecture – nine core modules that build themselves from your Quantum Intention Engine signals. Every widget interaction, every badge earned, every signal recorded contributes to module assembly.

APPENDIX

QUICK REFERENCE – ALL BADGES AT A GLANCE

WATER	ARCH	NAME	TRIGGER	RARITY	TYPE
°	└─	Droplet / Foundation	7-day streak	UNCOMMON	MILESTONE
≈	└─└─	Wave / Structure	30-day streak	RARE	MILESTONE
≈	└─└─└─	Current / Architecture	100-day streak	EPIC	MILESTONE
[!]	<!>	Glitch / Anomaly	Find hidden feature	SECRET	EASTER EGG
(*)	[*]	Starfield / Quantum	Active at magic time	SECRET	EASTER EGG
\ /	[>]	Sunrise / Boot	Check in 5–7 AM	SECRET	EASTER EGG
(~)	[_]	Void / Null	Active at midnight	SECRET	EASTER EGG
{o}	(#)	Oracle / Processor	10 questions / session	SECRET	EASTER EGG
///	===	Current / Loop	5 sessions in one day	SECRET	EASTER EGG
		Pillar / Column	All core widgets used	SECRET	EASTER EGG
/\/	^ ^	Summit / Apex	Reach level 60	LEGENDARY	EASTER EGG

CLOSING

THE PHILOSOPHY OF PLAY

LOT Computer is a self-care system that borrows from RPGs the thing that makes them compelling: progression. The satisfaction of earning something. The surprise of a hidden badge. The narrative of growth over time.

But unlike most games, what you earn here is real. A 30-day streak means you showed up for yourself 30 days in a row. A soul cartographer badge means you answered 250 honest questions about who you are. The XP is not fictional – it is a record of practice.

The easter eggs are not random. They are invitations to explore – to be curious enough to use the system at odd hours, to go deeper in a single session, to try every widget. They reward engagement with the full possibility of the tool.

"The system learns from you.
You learn from the system.
Neither of you is the same
as when you started."

– LOT Computer, v1.2.0
