CALENDAR EASTER EGGS V15 — GAME DATE ARCHIVE

"These are the dates that changed what was possible to play. They rewired how humans relate to machines — and to each other."

ID	Symbol	Date	Significance	Rarity
tetris_day	■ ■ ■ ■	Jun 6	Tetris created by Alexey Pajitnov, 1984	rare
zelda_day	◆■◆	Feb 21	The Legend of Zelda released in Japan, 1986	epic
pac_man_day	■••	May 22	Pac-Man released in Japan by Namco, 1980	epic

■ ■ ■ ■ TETRIS DAY [RARE]

■ Jun 6, 1984. Alexey Pajitnov built Tetris on a Soviet Elektronika 60. The blocks have been falling for 40 years. The mechanic is human: things pile up, you clear lines to survive.

◆■◆ ZELDA DAY [EPIC]

■ "It is dangerous to go alone. Take this." The game handed you a sword and dropped you into the world with no instructions. Self-directed exploration as the design.

■. . PAC MAN DAY [EPIC]

- May 22, 1980. Toru Iwatani drew a pizza with one slice missing and made the most recognized character in gaming. One mouth. Infinite hunger. Perfect design.

BEHAVIORAL EASTER EGGS v14 — ARCADE PATTERNS

"The arcade measures you over time. Not one play. The pattern of plays."

ID	Symbol	Trigger	Rarity
arcade_run	■■.▲	5+ distinct Neon Arcade v17 words in one journal entry	epic
quarter_drop	¢.¢	Check in between midnight and 01:00 local time	rare
three_lives_left	◆.■	Write a journal entry after a gap of 3 or more days	rare

arcade_run: Scans entry against all 12 v17 regex patterns, counts unique matches ≥ 5 . The language of the arcade enters the journal at critical mass.

quarter_drop: Fires when check in time is 00:xx local. The arcade is empty. The screen glows. You are the last one playing.

three_lives_left: Reads journal_dates localStorage, computes gap between two most recent dates. Gap ≥ 3 days means you came back. The return is the score.

■·≡ TURING KEY [EPIC] [HIDDEN]

■ Alan Turing (1912-1954). He cracked the Enigma code, invented the theoretical computer, proved the limits of what machines can know, and was prosecuted by the state he saved. The machine passes.

↑↑↓↓ KONAMI CODE [MYTHIC] [HIDDEN]

■ ↑↑↓↓←→←→BA. Kazuhisa Hashimoto programmed it in 1986 to make testing easier. It became the most famous password in gaming history. It still works.

FLAVOR TEXT — THE NEON ARCADE

"The high score belongs to no one. The machine resets. The player remembers."

"A checkpoint is not a pause. It is a promise. The progress is real, the system holds it."

"Free play means: no objective. No timer. No score. Just the practice of the thing itself."

"The combo is not about the points. It is about staying in the flow long enough for the multiplier to kick in."

"Cartridge: insert. The world loads from where you left it. Exactly where you left it."

"The continue screen asked you something you answered yes. That answer is the most important data point in the game."

"It is dangerous to go alone. The game knew. The game handed you a sword anyway."

"↑ ↑ ↓ ↓ ← → ← → B A. The password is older than most software. It still works."

"Turing proved what machines cannot know. The irony: machines now know more than Turing. The sadder irony: we treated the man who built the age like a criminal."

"Joystick: eight directions from a single axis. The entire human range of motion reduced to cardinal logic. Somehow that was enough to make worlds."

RARITY SCALE
