Prepared August 9, 2026 · Document: COSMO_COMPUTER_MANUAL

01 // WHAT IT IS

COSMO Computer is a 40mm × 40mm × 5mm dual-face desk object. One face is polished mirror-finish stainless steel – the object at rest, no markings, no display. The other face carries a camera, a screen, and a single button. The screen shows short, AI-driven notifications – a pager, not a chat client – sent from lot-systems.com. The example line used throughout LOT® product material is “Coffee time!” A single button lets you Copy the message currently on screen into your Log tab on the site.

02 // BOX CONTENTS

- | | |
|---|-----------------------|
| 1 | COSMO Computer device |
| 2 | Wireless charging pad |
| 3 | Quick-start card |
-

03 // SETUP

1. Place the device Face A (mirror side) down on the charging pad.
2. On lot-systems.com, go to Settings → Pair a COSMO Computer.
3. Enter the 6-digit pairing code shown on the device screen.
4. The device is paired and begins receiving pager messages.

1. Face A down on charge pad
2. Settings > Pair COSMO Computer

```
+-----+
|#####|
+-----+ <- charging
(( charge pad ))
```

```
| Pairing code: 4 8 1 2 |
|_____|
```

3. Enter code shown on device screen into the site form
4. Paired. Pager messages begin.
"Coffee time!" (example)

The pairing code expires after 10 minutes. If it expires before you finish, reopen the pairing panel on the site to generate a new one.

04 // USING THE BUTTON

SHORT PRESS (< 1.5s)

```
-----
-> COPY
  writes current message
  to your Log tab as
  HWCOPY: <text> <timestamp>
```

LONG PRESS (>= 1.5s)

```
-----
-> CAMERA (presence check)
  single still frame,
  device-local only unless
  "attach to log" is ON
```

Short press – Copy. Writes the message currently on screen into your Log tab as a new HWCOPY: entry, alongside the other log handlers already on lot-systems.com.

Long press (1.5 seconds or more) – Camera. Captures a single still frame, used on-device for a presence check only. The frame is never transmitted unless you have explicitly turned on “Attach photos to log” in Settings. This setting is OFF by default.

05 // CHARGING

COSMO Computer charges wirelessly (Qi-class induction) through the mirror (Face A) side. Set the device mirror-down on the included charging pad; Face B stays face-up and legible while charging. The internal battery is intentionally small – the device is designed to live on or near its charging pad rather than run for long stretches unplugged.

06 // CARE

The Face A mirror finish shows fingerprints readily by design – it is a polished surface, not a coated one. Wipe with a soft, dry or lightly damp cloth. Avoid abrasive cleaners, abrasive cloths, and solvents, which will dull the polish.

07 // SAFETY & PRIVACY

The camera is powered off at all times outside of an explicit long-press capture. There is no continuous recording mode and no local video buffer. Captured frames are not transmitted from the device unless the “Attach photos to log” setting is on, and that setting defaults to off. Your data is never sold to third parties.
