PART I – NEW BADGES v23

1.A – WORD TURN BADGES v14 – THE STARSHIP DECK (12 badges, NEW)

The vocabulary of space exploration applied to the self.

The starship is not a metaphor – it is the most accurate description of what you are doing when you arrive here.

You are piloting yourself through uncharted space.

The check-in is the telemetry report.

The journal is the mission log.

The archive is mission control.

Launch is not the end. It is the beginning of data.

Reentry is not failure. It is return with information.

The crew is whoever shows up with you.

The Starship Deck speaks to those who understand:

self-care is not a gentle art. It is a technical operation.

It requires countdown, telemetry, and the courage to dock.

PART II – IMPLEMENTATION NOTES v23

2.A – BUG FIX: first_signal → sputnik_signal

ISSUE: Two badges shared the ID 'first_signal'
– Achievement RPG v3 (10+ memory answers)
– Calendar v9 Sputnik Day (Oct 4)
JavaScript objects use last-write-wins for duplicate keys.
The Sputnik definition was silently overwriting the RPG v3 badge.

FIX: Calendar Sputnik badge renamed:
first_signal → sputnik_signal
Updated in: BadgeType union, BADGES registry, easter-eggs.ts

RESULT: Both badges now function correctly.
Achievement RPG v3 'first_signal' = 10+ memory answers
Calendar v9 'sputnik_signal' = check in on October 4

2.B – CALENDAR WIRE-UPS COMPLETED

PREVIOUSLY SPECCED BUT UNWIRED:

Calendar v8 – Game Anniversaries (specced in v17)
new_year_sig Jan 1 – New Year Signal
sonic_day Sep 9 – Sonic the Hedgehog birthday
winter_code Dec 25 – Holiday Protocol

Calendar v9 – Sci-Fi Literary Calendar (specced in v19)
turing_day Jun 23 – Alan Turing born 1912

pluto_discovered Feb 18 – Pluto discovered 1930

NOW ACTIVE: All 9 dates are live in checkCalendarEasterEggs()

2.C – WORD TURN VERSION NUMBERING

CODE ↔ SPEC ALIGNMENT:
The code implements word turn engines in sequence.
The spec (codex MDs) numbers them canonically.

v12 (Alchemist) – specced in Codex v21, pending code implementation
v13 (Oracle) – specced in Codex v22, pending code implementation
v14 (Starship Deck) – specced + implemented in Codex v23 (THIS)

Code comment labels were updated from v12→v14 to match spec.
Alchemist and Oracle word turn code implementation: future session.
