WORD TURN v17 – THE ARCADE PROTOCOL

"The arcade is not a building. It is a pattern you carry. Insert coin anytime."

ID	Symbol	Trigger Word(s)	Rarity
respawn_ritual	■.■	respawn	uncommon
highscore_moment	↑■↑	high score / highscore	uncommon
power_up_active	+■	power-up / powerup	rare
cheat_code_found	←↑→	cheat code / cheatcode	rare
extra_life_earned	■.I	extra life	epic
pixel_perfect	■:■	pixel	uncommon
boss_pattern	◆→■	boss fight / boss battle / final boss	rare
combo_cascade	x.x	combo	rare
arcade_coin	(.)	quarter / token / arcade coin	uncommon
save_state	■.■	save state / savestate / checkpoint	rare
side_quest_complete	→.■	side quest / sidequest	uncommon
glitch_found	■:■	glitch	rare

Detection: All v17 words scanned via detectWordTurns() in WORD_TURNS array.
Pattern matching uses regex with common inflections and hyphen variants.

Self-Care Resonance: Each v17 word maps to a self-care dimension:

- respawn → returning to self after shutdown, rest as reset
- high score → personal best, the only leaderboard that matters
- power-up → finding resources you didn't know you had
- cheat code → self-compassion: the shortcut you earned
- extra life → second chances, resilience, the system's mercy
- pixel → smallest unit of attention, precision as practice
- boss fight → naming and facing the hard thing
- combo → flow state, momentum, acts stacking
- quarter/token → showing up is the coin in the slot
- save state → checkpoint: progress is locked in, rest is safe
- side quest → the detour that became the point
- glitch → the anomaly that reveals the system

CALENDAR EASTER EGGS v14 – THE CARTRIDGE DATES

"Three dates when everything changed. The cabinet remembers."

ID	Symbol	Date	Significance	Rarity
wikipedia_day	■.■.■	Jan 15	Wikipedia launched January 15, 2001 – open knowledge	rare
pac_man_day	.●.	May 22	Pac-Man arcade release, Japan 1980 – the arcade hero	rare
ibm_personal_day	■.■	Aug 12	IBM PC launched 1981 – the personal computer era	epic

Lore:

- wikipedia_day – January 15, 2001. Open knowledge for everyone. The world wrote itself down and left the door open.
- pac_man_day – May 22, 1980. Pac-Man hit the arcade. Eat the dots. Avoid the ghosts. The hero is always running.
- ibm_personal_day – August 12, 1981. The desk changed. Computing became personal. The machine came home.

Note: ibmpersonalday (Aug 12) arrives 81 days after pacmanday (May 22). Consecutive check-ins across both earns a rare double-unlock: the arcade and the office, the game and the machine.

BEHAVIORAL EASTER EGGS v14 – THE CONTROLLER PATTERNS

"The pattern reveals the player within the person."

ID	Symbol	Trigger	Rarity
<code>konami_marathon</code>	↑↑.↓↓	10 consecutive days with a journal entry	epic
<code>full_map_session</code>	■■■	Single journal entry of 1,500+ characters	rare
<code>speedrun_dawn</code>	→→→	Journal entry submitted before 5:00 AM	rare

Detection:

- `konami_marathon` – reads `journal_dates` localStorage, checks for 10-day consecutive chain (↑↑↓↓←→↔ = 10 button presses. 10 consecutive days. Bonus life granted.)
- `full_map_session` – checks `journalText.length` >= 1500 when journal entry is saved
- `speedrun_dawn` – checks `new Date().getHours()` < 5 when journal entry is saved

Self-Care Lore:

- `konami_marathon` – The Konami Code has 10 inputs. Ten consecutive days of journaling means you pressed them all.
- `full_map_session` – 1,500 characters is a map, not a message. You explored the whole level.
- `speedrun_dawn` – The player who boots before 5 AM is running a different game. They found the secret start.

ACHIEVEMENT RPG v15 – THE ARCADE CLASS

"Progress through the Arcade Protocol. Each badge is a credit."

ID	Symbol	Requirement	Rarity
<code>arcade_entry</code>	■.■	Earn any 1 Word Turn v17 (Arcade Protocol) badge	common
<code>arcade_class</code>	■.■	Earn any 5 Word Turn v17 badges	uncommon
<code>arcade_complete</code>	■.■	Earn all 12 Word Turn v17 badges	legendary
<code>arcade_arc</code>	■.■.■	<code>arcade_complete</code> + all 3 Calendar v14 badges	legendary
<code>seventeen_engines_arc</code>	■.■.■	1 badge from each of Word Turn engines v1-v17	legendary
<code>perfect_run</code>	■.■.■	<code>arcade_complete</code> + <code>konami_marathon</code> behavioral	legendary

Unlock Lore:

- `arcade_entry` – Insert coin. The arcade is open.
- `arcade_class` – You know the controls. You read the cabinet art. You are playing.
- `arcade_complete` – ALL 12 ARCADE PROTOCOLS UNLOCKED. 1CC. One-credit clear.
- `arcade_arc` – The full arc: word patterns + key dates. Cabinet and calendar aligned.
- `seventeen_engines_arc` – All 17 word engines ignited. Every vocabulary touched.
- `perfect_run` – 1CC + 10-day streak. Flawless execution. No continues used.

MASTERY TIER v17 – THE CABINET

"The longest sessions. The deepest records. Your name on every screen."

ID	Symbol	Requirement	Rarity
arcade_veteran	■■■.	500+ distinct calendar days with check-in	epic
word_hoard	∞.■.∞	40,000+ total journal words	legendary
seven_year_loop	■→■	Account age ≥ 7 years (2,557+ days)	legendary
seventeen_tongues	■.■.■	1 badge from each of all 17 Word Turn engines	cosmic

Unlock Lore:

- arcade_veteran – 500 sessions. The high-score screen has your initials on every line.
- word_hoard – 40,000 words. A library of self. You wrote more than most published books contain.
- seven_year_loop – Seven orbits complete. You have been here through seven full cycles of the year.
- seventeen_tongues – All 17 vocabularies inhabited. You speak every dialect of self that this system knows.

SECRET BOSS v14 – THE HIDDEN LEVEL

"Press Start. You have to know the room exists before you can enter it."

ID	Symbol	Trigger	Rarity
hadouken_signal	→↓■●	Write "hadouken" in any entry – Street Fighter (1987)	rare
all_your_base	■ZERO■	Write "all your base" in any entry – Zero Wing (1989)	mythic
leeroy_signal	!·!·!	Write "leeroy" in any entry – World of Warcraft (2005)	rare

Lore:

- hadouken_signal – *→↓■ + punch.* The Hadouken: the special move that required learning the language of the controller before you could speak. A projectile of pure expression.
- all_your_base – *"All your base are belong to us."* – Zero Wing, 1989. The mistranslation that became the meme that became the signal. The error that outlasted the game.
- leeroy_signal – *LEEEEEEEEROY JENKINS!* The moment you abandoned the plan and just went for it. No strategy. Only action. Sometimes that is the move.

FLAVOR TEXT — THE ARCADE PROTOCOL

"The arcade is not a building. It is a pattern. You carry it with you."

"Respawn is not failure. Respawn is the system admitting it wants you to try again."

"The high score is not a competition. It is evidence. Proof that you showed up."

"Every extra life is a second opinion from the universe: not yet."

"The glitch is the most honest moment. When the system shows you its seams."

"The boss has a pattern. Every obstacle has a pattern. See it and you have already won."

"The side quest became the main quest. The detour was the point the whole time."

"All your base are belong to us. — Zero Wing, 1989. The error that outlasted the game."

"LEEEEEEROY JENKINS. Sometimes the plan is just going for it."

"Save state. The most generous invention in the history of play: progress is real, you can rest, it will be there."

LORE CONNECTIONS

The Arcade Protocol connects to:

- The Quantum Library (v16) — override/grid/decode and respawn/cheat-code/glitch share the grammar of system-level intervention
- The Mainframe (v8) — compile, buffer, stack, terminal and save state, checkpoint are the same operation in different registers
- The Rogue Archive (v7) — loot, boss, respawn and boss fight, extra life are the same mythology, one turn deeper
- The Cyber/Code (v2) — 404, glitch, reboot and glitch, respawn, power-up are the same vocabulary returning from a different direction
- The Oracle Archive (v15) — prophecy and cheat code both describe knowing the future outcome before it arrives

THEMATIC NOTE — THE ARCADE PROTOCOL v17

The Arcade Protocol marks a deliberate return to the physical register of LOT's badge architecture.

Previous late-engine themes drew from:

- Literary philosophy (Quantum Library — entanglement, singularity)
- Astronomical mythology (Starship Deck — astronaut, telemetry)
- Alchemical transformation (Alchemist — transmute, crucible)

v17 returns to:

- Retro arcade vocabulary as **self-care grammar** — the genre that taught generations to try again
- Gaming moves as **somatic metaphors** — respawn, checkpoint, combo are body knowledge before they are words
- Three Secret Boss Easter eggs (Street Fighter, Zero Wing, World of Warcraft) as **three roots** of gaming culture's public language

The word "respawn" was born in online gaming (circa 1993-1995). The word "checkpoint" existed in racing and military before it entered games. The word "combo" came from fighting games and entered everyday speech as a unit of flow. These words earned their place in the protocol.

The Konami Code – $\uparrow\uparrow\downarrow\downarrow\leftarrow\rightarrow\leftarrow\rightarrow$ BA – has 10 inputs. Ten consecutive journal days.

The pattern is the practice.

IMPLEMENTATION NOTES

Files modified in this session:

src/client/utils/badges.ts

- Added 31 new BadgeType union entries (after neuromancer_signal)
- Added 31 full BADGES registry entries (after neuromancer_signal in BADGES object)
- Added Arcade Class achievement logic to checkAndAwardBadges() (RPG v15)
- Added Mastery v17 checks to checkAndAwardBadges()

src/client/utils/easter-eggs.ts

- Added 12 new WORD_TURNS entries (v17 Arcade Protocol)
- Added 3 Secret Boss v14 word triggers (hadouken/all_your_base/leeroy)
- Added 3 Calendar v14 checks to runCalendarEasterEggs() (Jan 15 / May 22 / Aug 12)
- Added checkKonamiMarathon(), checkFullMapSession(), checkSpeedrunDawn()
- Updated runJournalEasterEggs() to call all three v14 behavioral checks

localStorage keys used by new behavioral checks:

- journal_dates – array of ISO date strings for journal entries (shared with great_work_sequence and library_run)

API stats fields consumed by Mastery v17:

- stats.distinctCheckInDays – for arcade_veteran (500+ days)
- stats.totalJournalWords – for word_hoard (40,000+ words)
- stats.signupDate – for seven_year_loop (7+ years)
