1. System Overview

LOT is an **RPG of self-care** — a Quantum Intention Engine that rewards consistency, depth, and curiosity. Every interaction with the Memory Widget, Planner, Emotional Check-In, and community generates signals. Signals feed the Quantum Intention Engine (QIE). The QIE drives badges, evolution, and the narrative engine. Nothing is cosmetic — every badge reflects a real behaviour pattern.

XP Model

Every badge earned = +1 Citizen Level. Streaks multiply XP. Crossing a 7-day streak activates the first milestone. Every answer to a Memory question adds depth XP. Using multiple widgets in one session triggers flow bonuses. The system never resets — only grows.

XP Breakdown

Memory answer	+10 XP	(Depth)
Planner entry	+5 XP	(Consistency)
Emotional check-in	+8 XP	(Care)
Streak day	+15 XP	(Consistency × streak_multiplier)
Widget flow (3+)	+20 XP	(Flow bonus)
Badge milestone	+50 XP	(any badge)
Easter egg found	+100 XP	(secret)

2. Milestone Badges — Oceanic Mayan

Milestone badges track consecutive days of practice. Inspired by Mayan cyclical time (K'in / Uinal / Tun) and water's natural progression from droplet to ocean. Each symbol is rendered in monospace — pure ASCII-safe Unicode.

Milestone Badge Set

Trigger	Meaning
Day 7	Circle + Wave — first pattern emerges
Day 30	Circle–Wave–Circle — full tide cycle
Day 100	Deep waves + circle — ocean mastery
Day 365	Five-wave embrace — deep current

Mayan Cycle Philosophy

- 1 K'in = 1 day (your atomic unit of practice)
- 7 K'ins = First LOT cycle → Badge: ■■
- 20 K'ins = 1 Uinal (traditional Mayan unit)
- 30 K'ins = LOT major cycle → Badge: ■≈■ (~lunar month)
- 100 K'ins = LOT mastery → Badge: ■■■ (approaching ¼ Tun)
- 365 K'ins = Full solar year → Badge: ■■■■■ [HIDDEN – Easter Egg]

The water metaphor layers onto this: ■ **Droplet** (a single moment), ≈ **Wave** (a pattern emerging), ■ **Deep Current** (an established flow), ■ **Circle** (the Mayan zero / completion symbol). Together they form badges that feel ancient yet futuristic — perfect for a quantum self-care OS.

3. Pattern Badges — Behavioral Achievements

Pattern badges are earned by **behavioral signals** detected by the QIE, not time. They reward diverse engagement, consistency in timing, deep reflection, and balanced exploration. They never expire — once earned, always held.

Symbol	Trigger	Description	Unlock Message
■—■	All 4 planner dims used evenly	Wave-Bar-Wave — tides balanced by stable foundation	Tides balance. ■—■
≈■≈	3+ widgets in one session	Waves around circle — fluid engagement around center	Flowing with the ocean. ≈■≈
—■—	Same time window, 5+ days	Bar-Circle-Bar — circle held steady by rhythm	Your current is steady. —■—
■■■	5+ deep memory Q&A exchanges	Moon-phases — inner/outer awareness cycling	Depth in reflection. ■■■
■.■	Diverse choices across 6+ widgets	Circle-Dots-Circle — scattered discovery, return	Curiosity guides you. ■.■
◆■◆	10 community connections made	Stars flanking circle — guiding others	Others follow your light. ◆■◆
■—■	21-day unbroken streak	Deep currents connected by a bar of devotion	Devotion runs deep. ■—■
■■■	QIE coherence > 80% for 3 days	Diamond-eyes around circle — quantum coherence	Signal locked. ■■■

Pattern badges appear as separators in the public profile between traits: mindful ≈■≈ present ■—■ aware —■— grounded. The more badges earned, the richer the profile tapestry becomes.

4. Evolution System — 7 Dimensions

The Interface Evolution System tracks 7 psychological dimensions. Each dimension unlocks features and subtly reshapes the interface. Growth is normalized 0–100%. Dimensions are not a score — they are mirrors.

Dimension	Symbol	Trigger Source	Interface Effect	Badge Gate
Intention	■	First check-ins, memory Q&A, community	Opacity increases, grid softens	None (starter)
Consistency	■■	Streaks, daily logins	Typography tightens, grid aligns	Week Warrior+
Depth	▼▼	Deep memory exchanges, long reflections	Glow effects activate	Deep Diver
Connection	■	Community interactions, cohort match	Social widgets expand	Bridge Builder
Intimacy	💞	Romantic/intimate memory Q	Private spaces unlock	50% Intimacy
Care	■	Self-care moments, emotional check-ins	Mood patterns widget	Care 50% or Lv.20
Courage	↑	Truth-telling, honest answers	Private spaces, narrative depth	100% Courage

Evolution Milestones (Notifications)

Threshold	Milestone Name	Notification	Effect

5. CQGS Citizen Index

The **CQGS Citizen Index** is your composite level — a single number derived from all activity: entries, answers, streaks, badges, and active days. It gates widgets, community features, and special titles.

Level	Title	Requirement	Badge Tier	ASCII Rank
1–4	Initiate	1–4 days, any activity	None	[·]
5–9	Seeker	5–9 days, 5+ memory answers	■ (Droplet)	[■]

15–19	Practitioner	15+ days, 2 pattern badges	■≈■ (Tide)	[■≈■]
20–29	Resonator	20+ days, 4 badges, Care ≥ 50%	■■■■ (Ocean)	[■■■■]

100+	Sovereign	100+ days, all badges, mastery	■ ■■■■ ■	[■■■■■■]

The Citizen Index is displayed in the **Evolution Widget** (Metrics view) and **Growth Milestones** widget. It never decreases. Titles appear on your public profile next to your Archetype.

6. Interface Feature Unlocks

The LOT interface evolves through four visual badge themes. Each theme affects animations, borders, backgrounds, and glow intensity. Users earn their theme by earning the relevant milestone badge.

Water Theme (■ → ≈ → ■)

Fluid animations. Organic curves. Radial gradients. Wave-based transitions. The interface breathes like the ocean — every scroll feels like a tide.

Architecture Theme (■■ → ■■■ → ■·■)

Geometric precision. Linear gradients. Structured pulse animations. The interface crystallises — deliberate, intentional, unwavering.

Constellation Theme (◆· → ◆◇ → ◆◇◆)

Celestial glow. Star patterns. Navigation metaphor. The interface charts your course through psychological space.

Quantum Theme (■· → ■■ → ■■■) [UNLOCKED AT MASTERY]

Diamond eyes and quantum flicker effects. Available only after reaching QIE coherence ≥ 80% for 3 consecutive days. Activates the ■ **Quantum badge**. The rarest visual theme in the system.

7. Self-Assembly Engine — 9 Modules

The Self-Assembly Engine tracks how the LOT OS **builds itself from your signals**. Each module progresses through 5 phases: Dormant → Awakening → Forming → Assembled → Integrated. This is shown in the **System Progress Widget** (Self-Assembly view).

Module	Signal Source	Phase 1: Dormant	Phase 5: Integrated	Badge Gate
Biofield Engine	Energy, mood check-ins	[█████]	[█████] ATP ONLINE	Care ≥ 30%
