COSMO® Cube – Quick Reference

Model C1 · Hardware Documentation Set v1 · DRAFT

What It Is

A two-part 316L stainless steel device, 40mm x 40mm, connected to lot-systems.com over Wi-Fi. It receives ambient, one-line notifications from the LOT AI, senses temperature/humidity/pressure/air quality, carries a camera, and has one button.

The Two Faces

Top Face – Camera, Screen, Button

- Camera, off-center, with a hardware-wired privacy LED that is on whenever the sensor has power – not a software toggle.
- 1 inch square OLED display, blank at rest. Shows one line of text only when the LOT AI has something worth saying.
- Copy button. One press writes an entry to the Log tab on lot-systems.com. Local acknowledgment first, sync after.

Bottom Face – Polished Stainless Steel

Mirror-polished, rests on a Qi wireless charging pad. A small ceramic window over the coil lets charging power pass through the metal shell – the rest of the face is unbroken polished steel.

The One Rule

Every notification the Cube shows follows the same rule as the rest of LOT(R): one line, no alarm, exact moment. It does not badge. It does not buzz. It waits, and when it speaks, the moment was earned.

Document Set

1. Product Plan and Roadmap
2. Bill of Materials
3. Mechanical Design
4. Firmware Specification
5. Software / LOT API Connector
6. Manufacturing and Compliance
7. This Quick Reference

Full specifications: docs/hardware/cosmo-cube/ in the LOT-Computer

repository.

Status

DRAFT – Phase 0, specification only. No physical unit has been built.

Roadmap: bench prototype, PCBWay PCB spin, 10-unit alpha, 100-unit pilot run, then a hardware add-on to the LOT(R) Usership tier.
