

LOT SYSTEMS

COSMO® Cube

A physical extension of the LOT operating system.

Quick Start Guide

LOT Systems, Inc. — Made in the USA — lot-systems.com

What it is

The COSMO® Cube is a 40 mm × 40 mm × 5 mm stainless steel ambient intelligence device connected to lot-systems.com. It receives short notifications from the LOT AI engine — for example, “Coffee time.” — and it logs a moment when you press the Copy button.

In the box

- 1 × COSMO® Cube
- 1 × Qi wireless charging pad, with USB-C cable
- 1 × this Quick Start card
- 1 × QR code card, linking to the full manual

The device

Back: mirror-polished stainless steel. Place this side face-down on the charging pad.

Front: a small display, a small camera, and one button labeled Copy.

Setup

- 1** Place the charging pad on your desk and connect it to power with the included USB-C cable.

- 2** Set the COSMO® Cube on the pad, mirror side down, centered. The LED breathes white while charging.

- 3** When the display turns on, follow the on-screen pairing code.

- 4** On lot-systems.com, go to My Devices, then Add Device, and enter the pairing code shown on the Cube.

- 5** Once paired, the Cube begins receiving notifications from your LOT account.

Daily use

Notifications

Short messages appear on the display for up to 30 seconds, then the screen returns to the clock. One line. No alarm.

Copy button

Press it to log the moment. Temperature, humidity, pressure, and orientation are captured and sent to the Log tab on lot-systems.com, tagged [COSMO® Cube].

Charging

Return the Cube to the pad any time. Full charge takes about 2.5 hours from empty.

Care

Wipe the mirror-polished face with a soft cloth. IP54 splash resistant. Not for submersion.
