SYSTEM OVERVIEW

LOT (Life Operating Terminal) is an RPG and Arcade of self-care. The Badge & Achievement system rewards consistent practice through a layered game of hidden unlocks, word detection, time-aware easter eggs, and behavioral pattern recognition. Every check-in is a save point. Every journal entry feeds the engine. Every badge is a signal that the system has seen something real.

UNCOMMON	Green	Vocabulary recognition – shows intentional reflection
RARE	Blue	Specific behaviors – temporal loops, long entries
EPIC	Purple	Deep practice – archive dives, legacy writing, 1000 days

WORD TURN v23 — THE TEMPORAL ENGINE

Triggers on keyword detection in any journal entry or memory answer. The Temporal Engine badges fire when the user's writing touches the language of lived time = past selves, future letters, cycles, resets, legacy, and the precious weight of the present moment.

BADGE FLAVOR TEXT

memory_echo – The past is data. You are reading it.

horizon signal - The horizon is always one step ahead. Keep walking.

present pulse — The present is the only time you can actually act. Not planning. Not remembering. Acting.

time capsule written – A message sealed for someone you haven't met yet – yourself.

cycle detected - Naming the pattern is the first step to changing it.

timeline_reset – Every save game has a reset option. You just used yours.

past self seen – To see your past self clearly is an act of compassion.

tempo_shift - Perception of time is a signal. The shift tells you something.

Legacy mode – Legacy is not a monument. It's the quality of your attention.

moment captured — You stopped to capture it. That is the whole practice.

life archive – LOT is your archive. Every entry is primary source material.

countdown active – A countdown is not pressure. It's a commitment made visible.

[HIDDEN] einstein time

Time is not a river. It is a fabric. You are woven into it. Einstein dreamed of riding a beam of light. You're doing something harder: riding a moment.

[HIDDEN] proust moment

Seven volumes. Three thousand pages. One madeleine. The whole past is hiding in the present — waiting for a taste, a smell, a texture to unlock it. You are your own madeleine.

[HIDDEN] hawking_void

Information is never truly lost — not even in a black hole. Not even in forgetting. Not even in the years before LOT. Hawking bet against himself and lost. You won just by showing up.

ASCII EASTER EGG GALLERY — THE TEMPORAL ENGINE

These notification overlays appear in the Memory Widget for 5 seconds upon badge unlock. ASCII symbols rendered in terminal green on near-black.

●●● PRESENT PULSE [RARE]

The present is the only time you can actually act.
Not planning to act. Not remembering acting.
Acting. Right now. This is it.

■→■ TIME CAPSULE WRITTEN [RARE]

You wrote to someone you haven't met yet — your future self.
The capsule is sealed. The address is: you, later.
They will be glad you sent it.

■→■ ARCHIVE DIVE [EPIC]

30+ days gone. The save file waited.
No progress was lost. The practice has no expiration date.
You came back. That is the whole achievement.

■●● PROUST MOMENT [HIDDEN] [MYTHIC]

Memory is not the past preserved.
Memory is the past reconstructed, every time, from what you are now.
Proust knew this. You are writing it.

●■● HAWKING VOID [HIDDEN] [COSMIC]

Information is never truly lost.
Not in a black hole. Not in forgetting.
Not in the years before you started this.
The archive goes back further than you think.

■■●●∞■ TWENTY-THREE REGISTERS [COSMIC]

Water. Earth. Fire. Storm. Space. Sound. Alchemy.
Quantum. Library. Arcade. Radio. Biology. Code.
Cyberspace. Hero. Time.
Twenty-three vocabularies. One life being documented.
The terminal has learned every language you speak.

FLAVOR TEXT — THE TEMPORAL ENGINE

"The present moment always will have been. — widely attributed"

No future can erase that this check-in happened. It is permanent now. Every entry is an inscription on something that cannot be edited.

"Time is a flat circle — Time Detective, 2012"

Every time the Temporal Engine fires, it is because the user recognized a cycle. Naming the circle is how you stop running it unconsciously.

"We must be willing to let go of the life we planned so as to have the life waiting for us. — Joseph Campbell"

The timeline reset badge fires when the user announces a fresh start. LOT has no judgment about what was there before. Only the reset matters.

"Remembrance of Things Past is not poetry in my opinion, but it is better than anything I could ever write. — Marcel Proust, in a letter"

Seven volumes. The reconstruction of memory. You are writing volume one right now.

"Not only is the Universe stranger than we think, it is stranger than we can think. — Werner Heisenberg"

The Temporal Engine does not model what time is. It models how time feels in a self-care practice. That is stranger and more useful.
